BIO

Junior Full-Stack Developer (MERN) with hands-on experience shipping production systems across manufacturing, real estate, and fintech domains. Comfortable owning a feature end-to-end — from backend architecture and API integrations through deployment and testing — with a focus on real-time, data-driven applications.

PROJECTS

Trading BOT

11/2025 – Present | Klaipeda, Lithuania

Designed and deployed an event-driven trading automation system integrating real-time market data, news scraping, and strategy-based execution logic, reducing manual market analysis workload by **80%**.

- Architected a modular backend and **Firestore** data model supporting **multi-user** trade lifecycle and execution workflows.
- Integrated external **APIs (IG Markets, TwelveData)** for real-time data ingestion and automated trade execution.
- Built **real-time monitoring** and **alerting system** with trading signal detection and **Telegram**-based notifications.
- Wrote and maintain **150+ Jest unit and integration tests** covering trading logic, execution flows, and API integrations to ensure reliability of core systems.
- Developed a full-stack dashboard with **Firebase Auth**, live market visualization, and analytics, self-hosted on a **VPS via Docker**.

Cook Assistant App

07/2025 – 11/2025 | Klaipeda, Lithuania

Built a client-facing interactive cooking assistant, integrating real-time 3D rendering (Blender/CC4), voice recognition, and AI-driven response logic within a MERN-based web application.

- Developed a **Node.js/Express** backend integrating the **OpenAI API** to process voice input, detect recipe intent, and fetch matching data from a **MySQL** database.
- Built an interactive **React** frontend with real-time conversation display, session controls, and dynamic UI state management.
- Integrated a 3D virtual assistant using **Three.js**, synchronized with voice output to create a conversational user experience.
- Implemented voice recognition using **browser APIs** to enable hands-free interaction and real-time recipe guidance.

WORK EXPERIENCE

DPRealEstate — Software Developer Intern

04/2026 – 07/2026 | Barcelona, Spain

- Independently designed and built 4 client-facing marketing websites for Dubai apartment developments licensed under **Binghatti Properties** (SkyFlame, Mercedes Benz City, Wraith, Skyterraces), used by the sales team to generate and capture buyer leads.
- Developed and deployed 2 of the websites to production at **dprealestate.net**, handling both build and hosting.
- Built the sites on a shared, reusable template architecture and authored a step-by-step implementation guide so other interns could independently build and launch similar project sites.

- Worked directly with the sales team to translate real estate licensing and marketing requirements into functional, deployable web interfaces.

Gretin - Tangier — Software Developer

02/2023 – 11/2023 | Tangier, Morocco

- Enhanced manufacturing systems for **Lear Corporation**, implementing pressure chamber controls and improving user access management using **Node.js**, **Express.js**, **Electron.js**, and **Java**.
- Refactored a legacy Java application using the **Factory design pattern**, reducing validation errors and stabilizing production exports.
- Developed and maintained **REST APIs** for industrial systems, supporting real-time operations for production workflows.
- Led onboarding and mentored 5 junior interns using **Agile** concepts, improving code quality and reducing recurring development errors by ~30%.

Jacob Delafon — Software Developer Internship

01/2022 – 03/2022 | Tangier, Morocco

- Designed and implemented a **C# Windows Forms** application to replace a legacy production system.
- Built and integrated a **SQL Server** backend for reliable data storage and cross-department access.
- Conducted testing and deployment, ensuring system stability and usability across production and quality teams.
- Improved cross-department data exchange efficiency, reducing task completion time by **20%**.

SKILLS

Primary Stack: Node.js, Express.js, React, MongoDB, Firebase

Other Languages: Java, C#, C

Databases: MySQL, SQL Server

Tools & DevOps: Git, Docker, Linux, CI/CD, Jenkins (basic), Bash

Testing: Jest (150+ tests written, unit & integration)

Core Computer Science: OOP, Data Structures & Algorithms, Design Patterns

EDUCATION

Bachelor's degree in Computer Science — *Klaipėdos valstybinė* 2024 – 09/2027 (Expected) | Klaipėda, Lithuania
kolegija

Technician Diploma in IT Development — *Institute Ciel*

2020 – 2022 | Tangier, Morocco

CERTIFICATES

freeCodeCamp — [JavaScript Algorithms and Data Structures Certification](#)

SCRUMstudy — Scrum Fundamentals Certified (SFC), March 2026

iLEARN — KanbanLearn Kanban Awareness Certified, March 2026

LANGUAGES

Arabic: Native

English: Fluent

French: Advanced

Spanish: Basic

Lithuanian: Basic

INTERESTS

Software engineering, fitness, game development, financial markets
